PROFESSIONAL SUMMARY

Results-driven Data Analyst specialising in automation, data transformation, and delivering actionable insights through advanced analytics. Proven track record transforming manual processes into automated workflows (12+ days reduced to 2 days) and creating stakeholder dashboards and reports. Expert in R and Tableau with strong proficiency in Python and SQL. Demonstrated ability to work autonomously, solve complex problems independently, and communicate effectively through comprehensive documentation. Continuously developing technical expertise in business intelligence, R programming, and scalable data workflows.

CORE COMPETENCIES

- **Data Automation & Process Optimisation**: R automation scripting, Python workflows, workflow scheduling, process monitoring
- **Business Intelligence & Visualisation**: Tableau, executive dashboards, data storytelling, stakeholder reporting
- **Database & Workflow Technologies**: SQL, Azure SQL environment, workflow scheduling, data quality processes
- **Advanced Analytics**: Python (Pandas, NumPy, Scikit-Learn), SQL, statistical analysis, exploratory data analysis
- **Machine Learning**: XGBoost, Random Forest, regression models, feature engineering, predictive modelling, model evaluation
- **Data Quality & Governance**: Regulatory compliance, data integrity frameworks, audit trails, automated QA processes
- **Independent Execution**: Autonomous project delivery, self-directed problem-solving, comprehensive documentation

PROFESSIONAL EXPERIENCE

Data Analyst, **Essential Services Commission** | *May 2025 – Present* | *Melbourne, VIC*

- Built automated QA pipelines in R that reduced the quarterly regulatory data validation process from 12+ days of manual work to under 2 days, strengthening data integrity, auditability, and team capacity
- Engineered enterprise-grade automated reporting system in R (5,000+ lines, orchestrator pattern with 10+ modular functions) that reduced Retailer Profile Report generation from 30+ days to 10 minutes, integrating Azure SQL database queries, dynamic calculations, and automated visualization generation to produce 30+ interactive HTML reports with intelligent, scenario-based commentary
- Led cross-functional project delivering transcription infrastructure for active litigation processing, implementing immediate open-source solution while evaluating enterprise AI platforms—establishing Commission's first generative AI use case and setting precedent for responsible AI adoption within government policy frameworks
- Own monthly disconnections reporting providing critical regulatory insights to Energy Division leadership, CEO, and Commissioners, directly informing consumer protection policy decisions
- Execute and maintain quarterly license fee calculation scripts that determine Commission funding structure, implementing comprehensive QA processes to ensure financial accuracy and regulatory compliance

Data Analyst (Contract), **Waikare Community Development & Research Trust** | *July – October 2024* | *HRCNZ Funded Project*

Pona Kaká Initiative

- Conducted comprehensive qualitative and quantitative analysis on Māori arthritis management for the Pona Kaká Initiative, working independently to transform interview transcripts into structured, actionable insights
- Built analysis-ready datasets independently using Python and Excel, performing descriptive statistics and trend analysis that informed community health recommendations and policy discussions

- Created stakeholder-ready Canva reports that translated complex research findings into accessible formats, earning recognition from project sponsors and invitation for future collaborations

Retail Forex Trader, Self Employed | *May 2020 – January 2024* | *Location Independent*

- Managed personal trading portfolio, analysing large financial datasets to optimise strategies—improving win/loss performance by 31% through disciplined, data-driven decision-making
- Implemented systematic backtesting and risk management frameworks, reducing trading losses by 25% through rigorous strategy validation and continuous performance monitoring
- Led strategy workshops for traders, demonstrating ability to communicate complex analytical insights effectively and mentor others in data-driven approaches

MACHINE LEARNING PORTFOLIO

Employee Attrition Prediction Model **|Google Advanced Data Analytics Professional Certificate** | *February 2025*

- Built XGBoost predictive model achieving 96.7% AUC-ROC for employee attrition forecasting, enabling proactive HR retention strategies through data-driven insights
- Improved recall by 15.38% through strategic feature engineering and data leakage elimination, demonstrating rigorous analytical methodology and model optimisation skills
- Developed comprehensive, actionable recommendations for HR teams to implement retention strategies based on workload balance, career growth, and compensation transparency

TikTok Content Moderation Classification System **| Google Advanced Data Analytics Professional Certificate** | *January 2025*

- Developed Random Forest classification model achieving 99.5% accuracy and 99.21% recall for automated content moderation—dramatically reducing manual review workload while maintaining quality standards
- Conducted comprehensive exploratory data analysis using Python (Pandas, NumPy, Seaborn) to uncover engagement patterns and inform model development
- Created interactive Tableau dashboards enabling stakeholders to explore key findings and data-driven insights independently

LEADERSHIP & OPERATIONAL EXCELLENCE

22 years leading high-performance teams in hospitality management, including 3 Head Chef positions. Consistently delivered results under pressure while managing operations, budgets, and team development. Reduced operational waste by 30% through data-driven decision-making. This foundation in autonomous leadership, accountability, and systematic problem-solving directly informs analytical approach and independent execution capability.

EDUCATION

- **Professional Certificate | Google Business Intelligence**, *Coursera — In Progress Developing expertise in ETL pipeline design, data warehouse architecture, and advanced BI dashboard development*
- **Professional Certificate | Google Advanced Data Analytics**, *Coursera — Completed 2025*
- **Professional Certificate | Google Data Analytics**, *Coursera — Completed 2024*
- **Course | Google AI Essentials,** *Coursera — Completed 2024*
- **Professional Cookery Levels 1 – 4 |** *Hospitality Standards Institute*
